

OpenGreens bee monitoring

DO NOT
OPEN
TILL
MONDAY
THIS!

BEES ARE ACCLIMATISING
TO THEIR NEW HOME

OS linux
microprocessor
connected to
the internet

USB powered
arduino
sensorboard
sending data
over digital port

sensors inside:
3 x temperature
1 x humidity
1 x CO2

2 hacked
logitec webcams
realtime
streaming

sensors outside:
temperature/
humidity
combined

ventilation holes

dadant-blatt
observation beehive

honey super

broodbox

bee colony
*apis mellifera
carnica*

4 sides with
observation windows

landing platform

BEE HIVE SENSOR FRAME + SYSTEM

Sensor board is running firmware for reading analog and i2C sensors and sending data via serialport(ASCII)

MB is running linux, webserver, video audio streaming server compatible with ICECAST

Sensor FRAME : temp, humidity,CO2

regulator

12V/3A

12V/26Ah

akumulatur

12V

system power
12V / max 2A

Man in maroon shirt

Man in black t-shirt

VĚŘÍME V KRIZI!
